For Respiratory Depression

(resp. rate <8/min &/or sedation Score ≥2)

Give: Naloxone Dose: up to 400microgrammes IV
Dilute 400microgrammes with 3ml Sodium Chloride 0.9% & give 100microgrammes (1ml) increments

Prescriber to sign
Date
Approved by DTAG 15/07/2023 V1

For Respiratory Depression
